## DETAILED ACTION

### *Drawings*

1. In response to applicant's arguments on February 22, 2005, although Figure 5 is not necessarily inconsistent with the description on page 28, lines 11-14 and 17-19, the Examiner suggests including a summing means or adder between the delay elements, as suggested by the detailed description ("each of the delay elements DL<sub>2</sub>-DL<sub>15</sub> receives a sum of a delayed signal from each of the preceding delay elements and the correlation signal . . ." *emphasis added*), for clarification and to more accurately correspond to the detailed description.

### *Specification*

2. The abstract of the disclosure is objected to because on line 10, "summing processing" should be "summing process". Correction is required. See MPEP § 608.01(b).

### *Claim Objections*

3. The claims are objected to because of the following informalities:

a. on line 7 of claims 14, 15 and 17, "said spread signal into the divided codes" should be "said spread spectrum signal" (see line 3 of the respective claims). "Into the divided codes" should be deleted since the spread spectrum signal is not despread "into divided codes";

- b. in claim 18, line 8, "making reference" should be "referring" for improved readability;
- c. in claim 18, line 9, "divided code" should be "plurality of divided codes" (see claim 17, line 4);
- d. in claim 19, line 2, "are constituted to" should be deleted;
- e. in claim 21, line 7, "making reference" should be "referring" for improved readability.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In lines 9-10, it is unclear how the synchronization detection means and/or the despreading means relate to the spread spectrum processing apparatus of any of claims 14-18.

#### ***Allowable Subject Matter***

6. Claims 14-20 are allowable.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Betsy L. Deppe whose telephone number is (571) 272-3054. The examiner can normally be reached on Monday, Tuesday and Thursday.
